SUMMARY

Associate Product Manager with around **5 years of experience in fintech**, specializing in **data-driven decision-making**, **AI-enabled product improvements**, and **end-to-end ownership** of B2C and B2B journeys. Leveraging a strong foundation in **Software Engineering**, I transitioned into Product Management after recognizing how deeply system logic influences user experience and business outcomes. Skilled in **funnel optimization**, **A/B testing**, **SQL analysis**, **API integrations**, and **UI/UX enhancements**. I help drive impactful product decisions and support seamless roadmap execution contributing to measurable results such as a **30% revenue uplift** and a **17% reduction in early-stage drop-offs**.

WORK EXPERIENCE

Tax2win (Now Part of Groww)

Jaipur, India

Associate Product Manager

Jun. 2023 - Present

- Worked on **key product features aligned to the roadmap**, supporting senior PMs with requirement gathering, user flows, edge-case handling, and **UI/UX improvements** collaborating closely with engineering, design, and CA (tax) teams across both B2C and B2B tax-filing journeys.
- **Spearheaded the feature vision and requirements** for the **new ITR-3 tax filing product**. Worked on the detailed flow logic, technical requirements, wireframes, and UX refinements that improved clarity and reduced user friction. This launch became a key driver of the DIY platform revamp and contributed to a **30% increase in revenue** with higher user adoption.
- **Leveraged product analytics** to identify that **73% users preferred UPI** and led the launch of an express checkout flow with an embedded **dynamic Pay QR**, eliminating payment gateway redirects, **reducing checkout drop-offs by 12%**, and **increasing checkout conversion by 10%**.
- **Conceptualized and delivered an AI-powered tax-assistance chatbot**, working with engineering to design conversation flows, retrieval logic, and dataset structures. Leveraged **Retrieval-Augmented Generation (RAG) with open-source LLMs** to enable contextual responses from internal guides and tax laws, reducing reliance on costly external models and improving user query resolution without increasing support load.
- **Defined and delivered an in-house payment orchestration platform** with multi-gateway routing, improving payment reliability during peak traffic, reducing transaction failures, and contributing to an **18% increase in revenue**.

Backend Web Developer

Apr. 2021 - Oct. 2022

- **Engineered a robust Form 16 parser** that streamlined the self-filing user journey for salaried employees by transforming a manual data-entry process into an automated flow, resulting in an **18% increase in ITR filings**.
- Designed and developed **RPA automation solutions** with complex **API integration** to optimize high-volume **B2B backend operations**, successfully driving a **35% increase in revenue** for specific business lines.
- Led internal **security assessments** and resolved critical platform vulnerabilities, implementing proactive changes to user login credentials to **maintain user confidentiality** and ensure a secure product experience.

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University (Formerly Uttar Pradesh Technical University)

Agra, India

B.Tech in Computer Science & Engineering

Aug. 2016 - Sep. 2020

- CGPA : 7.53 (Hons.)

SKILLS

- **Product Strategy & Execution** : Roadmap Support, Feature Prioritization, Agile Methodologies, A/B Testing, User Research, Cross-functional Collaboration, Stakeholder Management, QA Coordination
- **Analytics & User Insights** : Funnel Analysis, Customer Journey Mapping, User Feedback Analysis, Google Analytics, MoEngage, CleverTap
- **Technical & Platform Skills** : API Integration, SQL (MySQL), Automation Workflows, Security Analysis, Test Case Design, Python, Node.js
- **Tools** : Figma, Whimsical (Wireframing), Jira, Postman, Git, Trello, Mermaid (Flowcharts)

PROJECTS

Web Automation

- Dedicated open-source contributor in my GitHub organization, focused on web automation and creating user- friendly solutions to enhance web experiences for everyone.

PUBLICATIONS

- Published a research paper titled **"Intelligent Surveillance System Using Machine Learning"** in CRC Press, Taylor & Francis Group (Florida, USA). eBook ISBN: 9781003097181

ACHIEVEMENTS

- **Zomato (Dineout) Business Logic Bug Bounty**: Received a \$100 bounty for identifying a business logic vulnerability that allowed users to repeatedly exploit birthday promo coupons by changing their birthdate, preventing potential revenue leakage.
- **NASI Meet, IIT BHU**: Presented a Nanotechnology project and received a project acceptance certificate from the NASI Meet at IIT-BHU.
